

T-shirts

B&B Embroidery.

- I based a quote on 100 total pieces. For a good quality t-shirt with a one color silk screen on the front and back the estimate is about \$9.
- I also asked about a polo shirt with an embroidered crest on it. For a generic dry fit shirt with a front embroidery the estimate was about \$25.

What do we want:

- Two t-shirts for about \$18
- One t-shirt and one polo for about \$35
- Some other combination of the above based on the estimates given.

The design

- Do we want the kids to design a logo or is there a stock logo we want to use?
